

## Ensuring critical communications everywhere:

### The Trade-Up to Iridium Program

*Iridium will donate a portion of proceeds generated by the Trade-Up to Iridium Program to the Association of Public-Safety Communications Officials Silent Key Scholarship Fund. In honor of deceased APCO International members, the Fund offers training and educational opportunities to current and future public-safety communications professionals.*

In response to safety concerns following the much-publicized degradation of Globalstar's voice service, Iridium is expanding its popular Trade-Up to Iridium program to help ensure that everyone who needs a reliable satellite telephone is able to purchase one. The program offers a rebate of up to \$400 on a new Iridium 9505A satellite phone and up to \$300 in airtime credits for new Iridium customers signing up for a qualified calling plan.

#### **The need for truly global communications, without limits or compromises**

Iridium understands that satellite phones are critical lifelines for people who live, work or play in areas without adequate ground communications infrastructure, or who rely on satellite links for mission-critical communications when disasters strike. In these situations, missed connections, dropped

calls and poor signal strength are simply unacceptable. A reliable satellite phone helps save lives and property.

Iridium's goal is to ensure that every satellite phone user has access to the only consistently reliable global satellite communications service in the world. Iridium is now recognized to be the only satellite communications service that dependably provides a critical communications lifeline everywhere.

#### **The Trade-Up to Iridium Offer**

Turn in your Globalstar phone to a participating Service Provider and sign up for a minimum two-year Iridium postpaid calling plan. You'll get up to a \$400 cash rebate on a new Iridium 9505A satellite phone, plus up to \$300 in free airtime (10 free minutes per month for 24 months). To qualify, you must be a new Iridium subscriber.

*“In a 2008 report entitled **Mobile Satellite Services: Status Check for First Responders, independent research analyst firm Futron Corporation scored Iridium higher than all other MSS companies, with an ‘optimal’ rating in 10 out of 11 criteria.**”*

**Qualifying Globalstar Phones**

- Qualcomm GSP-1600
- Qualcomm GSP-1700
- Qualcomm GSP-550
- Ericsson R-290
- Telit SAT-550
- Telit SAT-600
- GSP-2900 Fixed Unit
- GSP-2800M Marine Fixed Unit
- GSMP 2100/2101
- FAU 200

**Iridium North America Service Plan**

- 2-year (24 month) minimum commitment
- 10 free North America voice minutes per month
- Unused minutes do not roll-over
- 600 Early Termination/Deactivation fee

**Iridium North America Coverage**

- *Region includes all areas listed above, plus 12 nautical miles from coasts.*
- *Due to the small geographical size or location of some areas, particularly islands, calls may be interpreted by the system as originating from outside the North America region and rated at the out-of-North-America rate. For these areas, the North America rate and North America service availability is not guaranteed.*
- *The Continental United States does not include Hawaii, Guam, Northern Mariana Islands and American Samoa.*

**About Iridium**

Iridium Satellite LLC ([www.iridium.com](http://www.iridium.com)) is the only mobile satellite service (MSS) company offering pole-to-pole coverage over the entire globe. The Iridium constellation of low-earth orbiting (LEO), cross-linked satellites provides critical voice and data services for areas not served by terrestrial communication networks. Iridium’s subscriber growth has been driven by increasing demand for reliable, global communications. Iridium serves commercial markets through a worldwide network of hundreds of distributors, and

provides services to the U.S. Department of Defense, and other U.S. and international government agencies. The company’s customers represent a broad spectrum of industry, including maritime, aeronautical, government/defense, public safety, utilities, oil/gas, mining, forestry, heavy equipment and transportation. Iridium has launched a major development program for its next-generation satellite constellation, Iridium NEXT, which will result in continued and new Iridium MSS offerings. The company is headquartered in Bethesda, Md. and is currently privately held.
