

Iridium Enhanced Mobile Satellite Services (EMSS)

PRODUCT CATALOGUE

Take advantage of a first-of-its-kind fixed price contract between the US government and Iridium for secure, reliable, low-latency global communications solutions.

Delivering a Global Tactical Advantage

The following devices use the Iridium® network to put unlimited voice and data at your command – everywhere:

IRIDIUM 9505A

The US-made Iridium 9505A is compact, lightweight and built for reliable use in the toughest environments. It features a solid design with hardened keypad, rubber overmold grip and removable articulating antenna.

IRIDIUM EXTREME®

Iridium Extreme is the toughest Iridium handset ever. Engineered with more innovative features and more accessories than any other Iridium satellite phone, it supports the most-demanding users in harsh conditions everywhere.

NETTED IRIDIUM®

Netted Iridium distributed tactical communications system (DTCS) supports secure, reliable over-the-horizon and on-the-move mission critical communication – with global push-to-talk capability to an unlimited number of users.

DELORME INREACH™

DeLorme inReach is a truly affordable satellite messenger with an ergonomic pushbutton interface, message delivery confirmation, interactive SOS, GPS position tracking and truly global coverage – all in the palm of your hand.

BRIARTEK CERBERUS

Briartek Cerberus is a three-part global communication system that wirelessly pairs with smartphones to let you send and receive messages, drop breadcrumbs and display incoming alerts to help keep you safe anywhere on Earth.

NAL SHOUT NANO PERSONNEL TRACKER

SHOUT nano is a global two-way handheld communication device and emergency beacon. Designed for ultra-low power consumption, its LCD display and on-screen keyboard enable transmission of free text and canned messages.
