

## New Iridium 9505A USB to Serial Cable for Iridium AxxessPoint accessory

October 05, 2013

### Overview

Effective October 05, 2013, new Iridium 9505A USB to Serial cable for Iridium AxxessPoint accessory is available for ordering. This cable provides customers the flexibility to connect their Iridium 9505A satellite phone with an Iridium AxxessPoint device and establish a Wi-Fi hotspot.

The Iridium 9505A USB to Serial cable for Iridium AxxessPoint is designed to connect with an RS232 data adapter, which is attached to Iridium 9505A satellite phone, with an Iridium AxxessPoint device. Users must have the RS232 Data adapter (available separately for purchase on Iridium website, part number RDA0401) in order to establish a successful data connection between Iridium AxxessPoint device and Iridium 9505A handset.

The USB to Serial cable comes with a pre-installed firmware that allows customers to establish a seamless data connection between Iridium 9505A satellite phone and Iridium AxxessPoint device.

**Important note:** Iridium AxxessPoint firmware should be upgraded to version 2.6.5 for establishing connectivity with Iridium 9505A handsets. The firmware and upgrade instructions can be downloaded from this location:
